

6 December 1954

MEMORANDUM TO: Assistant Director, Research and Reports

ATTENTION : SA/RR
THRU : Ch/G

FROM : Chief, D/GG

SUBJECT : Request for Consultant Services

25X1A5a1

25X1A5a1

1. Request is made for the employment of [REDACTED] consultant on geodesy to D/GG/X, for [REDACTED] working days during the pay period ending 15 December 1954.

25X1A5a1

2. [REDACTED] will be consulted on problems relative to a long-term analysis of Soviet methods of arc measurements, particularly with regard to their methods of adjusting observational data to an ellipsoid of reference. The Soviet methods, which differ markedly from US methods, are particularly important since their results apply to a larger longitudinal distance than in the US, and hence appear to give the Soviets an advantage in the problem of measuring long lines.

3. Most of the materials used by [REDACTED] are unclassified although some US documents, classified SECRET, are made available as needed.
